PROFESSIONAL SUMMARY

Cybersecurity professional with hands-on experience in security operations, IAM, vulnerability management, and cloud infrastructure security across enterprise environments. Experienced with CrowdStrike, Okta, AWS, Azure AD, Nessus, and Active Directory, with a focus on detection, hardening, access control, and operational security workflows. Currently pursuing GIAC GCIH certification with interests in remote security operations and cloud security engineering.

SKILLS

- **Security & Risk:** GRC · Vulnerability Management · Risk Assessments · Access Control · IAM · System Hardening · Policy & Compliance Alignment
- **Tools & Platforms:** CrowdStrike Falcon · Axonius · Nessus · Nmap · Wireshark · Active Directory · Okta · Azure AD · AWS · ServiceNow · Jira · LAMP Stack
- **Frameworks & Standards:** NIST 800-53 · ISO 27001 · CIS Controls
- **Infrastructure & Networking:** Windows Server · Linux Administration · TCP/IP · Event Viewer · Windows Firewall

EXPERIENCE

Virtual Reality User Experience Support November 2025 - Present
Yupix- West Palm Beach, FL

- Operated VR systems, handling headset setup, connectivity, and scene execution for client walkthroughs.
- Provided on-site technical support, ensuring stable system operation and smooth client-facing sessions.

Information Technology Specialist June 2024 - October 2025
Jewish Community Synagogue- Palm Beach Gardens, FL

- Provided end-user support across Windows desktops, printers, AV systems, and local Wi-Fi, ensuring reliable tech functionality for events and daily operations.
- Installed, configured, and maintained PCs, routers, and basic network infrastructure; documented procedures and recommended upgrades aligned with user needs and budget.
- Diagnosed and resolved technical issues, including software updates, network outages, applying structured troubleshooting and strong communication with non-technical users.

Information Technology & Cybersecurity Intern February 2024 - April 2024
FOX Corporation- Los Angeles, CA

- Monitored 50+ endpoints using CrowdStrike and Axonius, identifying user access anomalies and a 15% spike in failed login attempts, improving incident response efficiency across support teams.
- Extracted logs from 20 critical systems using RTR, collaborating with IT to remediate cached credential issues and support incident tracking aligned with performance metrics and internal quality parameters.
- Leveraged CrowdStrike to triage security alerts, deliver real-time threat intelligence, and perform root cause analysis to support incident response efforts.

Sales Associate September 2023 - January 2024
T-mobile- Palm Beach Gardens, FL

- Assisted customers with mobile device troubleshooting, service configuration, and account support in a fast-paced environment.
- Handled inbound calls and customer inquiries while maintaining accurate communication regarding products, services, and technical issues.

- Collaborated with team members to support sales operations and deliver strong customer service outcomes.
- Maintained up-to-date knowledge of mobile technology, service plans, and device features to support customer problem resolution.

PROJECT LIST

Identity & Access Management

- Configured Okta IAM policies including MFA, SSO provisioning, lifecycle management, and role-based access controls in a simulated enterprise environment.

AWS & Azure Cloud Security

- Configured Azure virtual networks, Active Directory integration, AWS IAM policies, MFA, and least-privilege access controls across cloud environments.

Infrastructure Automation

- Automated Linux and Windows server deployment using Ansible and PowerShell to streamline infrastructure provisioning and configuration management.

Vulnerability Management & Hardening

- Conducted authenticated vulnerability scans using Nessus, implemented Windows Firewall hardening, and remediated SWEET32 and SMB-related security risks.

Network Traffic & Exposure Analysis

- Performed network analysis using Wireshark and Shodan to identify exposed services, insecure protocols, and external attack surface risks.

Detection & Canary Token Deployment

- Deployed Canary Tokens to detect unauthorized access attempts and improve monitoring visibility across simulated environments.

EDUCATION

Bachelor of Science in Cybersecurity (B.S.)

February 2025

Full Sail University, Winter Park FL

Course Director Award in Information Technology (August, 2024)

Associate of Science in Information Technology

December 2023

Full Sail University, Winter Park, FL

Course Director Award in Information Technology (April, 2023; August, 2023)

CERTIFICATIONS

CompTIA Security+

- GIAC GFACT.
- GIAC GSEC.
- GCIH (In Progress)
